HOMEOWNER TIPS

TIP #001

YOUR FALL HOME CHECKLIST

7 PRACTICAL STEPS TO PREPARE YOUR HOME FOR COLDER WEATHER

- [ ] Clean gutters and downspouts; flush with water
- [ ] Test your heating system before the first cold snap
- [ ] Check or replace your furnace filter
- [ ] Seal drafts around doors and windows
- [ ] Disconnect hoses and winterize exterior faucets
- [ ] Test smoke and carbon monoxide alarms
- [ ] Review and practice your family's fire and CO emergency plan

Safety First:

If a smoke or carbon monoxide alarm sounds, get everyone outside immediately, call 911 from a safe location and do not re-enter until emergency personnel say it's safe.
